Fat Dissolving - Lemon Bottle

Lemon bottle fat dissolving injection are designed to target and eliminate stubborn fat in certain areas of the body, such as the abdomen, hips, thighs, and upper arms. The procedure is virtually painless.

During treatment, lemon bottle's advanced solution is injected into the fatty deposit area. It then gets to work under the skin, breaking down the stubborn fat wall before breaking down each fat cell, turning the fat into fatty acid. The effects of lemon bottle fat dissolving injections can be noticed right from the start, providing immediate action to target stubborn fat deposits. Most patients require several sessions to achieve their desired results, and it typically takes a few weeks to see the full results of the treatment.

A course of 5 treatments is recommended for all areas, 15% discount is applied to all courses

Small area: Full price £350, 15% off price £297.50, saving £52.
Medium area: Full price £500, 15% off price £425, saving £75.
Large area: Full price £650, 15% off price £552.50, saving £97.50.

Dissolve and Drain

The tan is applied to accentuate muscle contours, create muscle definition and a toned look to your physique.

Under 16's Spray Tan

We are happy to accommodate any age for spray tanning as long as all clients under the age of 16 are accompanied to their appointments by an adult.

VIP Membership

As a VIP Member you can get as many spray tans as you want each month for just £45. Yes, we did say as many tans as you want!! That's a real steal as a single tan cost is £25! Saving you pennies after just 2 tans!

Here's how it works: membership is a 4-week rolling deal, so your payment rolls every 4 weeks without you having to do a thing. Most of our members find that popping in every 10 or 11 days is just right and means there's no need to scrub the skin extra hard before the next session. But hey, if you're all about that tan life, some of our members swing by every single week!

The best part? If you've got your membership, last-minute plans are no sweat. You're already covered, so just book in and let us do the rest. Just a heads up - check out the terms and conditions for late cancellations and no-show fees. But we're about no stress, so there's no long-term contract here with our membership. If you want to cancel? Just give us a heads up 7 days before you want to bow out and we'll have you sorted.

Ready to glow on the go? To sign up simply click on the section on our site 'MOHB Monthly Spray Tan Membership' and let's keep you looking radiant all year round!

T&C's

Membership: Membership is £45 per month; billing is on a rolling 4 weekly basis. This allows you to schedule an unlimited number of tans within each month. Advanced Laser Treatments

Intense Pulsed Light / Laser Skin Rejuvenation

Laser skin rejuvenation is a non-invasive cosmetic procedure that uses laser technology to improve the appearance and texture of the skin. It is designed to address various skin concerns, including fine lines, wrinkles, sun damage, uneven pigmentation, and overall skin tone irregularities.

Key features include:

Laser Technology:

Different types of lasers may be used, such as ablative or non-ablative lasers. Ablative lasers remove thin layers of skin, while non-ablative lasers stimulate collagen production without removing the outer skin layer. One of the primary goals of laser skin rejuvenation is to stimulate the production of collagen, a protein that contributes to the skin's elasticity and firmness. Increased collagen helps reduce the appearance of fine lines and wrinkles.

Targeted Treatment:

Laser devices can target specific skin issues or areas, allowing for precise treatment. This flexibility makes laser rejuvenation suitable for various skin types and concerns. Non-ablative laser treatments typically have minimal downtime, as they do not remove the outer layer of skin.

Sun Damage Correction:

Laser skin rejuvenation is effective in addressing sun damage, including sunspots and pigmentation irregularities. The laser targets melanin in the skin, breaking down unwanted pigmentation. The procedure helps improve skin texture and tone, promoting a more youthful and radiant appearance. It can also enhance skin tightness and reduce the size of enlarged pores.

Before undergoing laser skin rejuvenation, we invite you for FREE consultation and patch test with one of our skincare professionals to assess your skin concerns and determine the most suitable laser treatment. While the procedure is generally safe, it's crucial to follow post-treatment care instructions and protect the skin from sun exposure.

Hair Growth Centre

- PRP Therapy -

Platelet-rich plasma (PRP) is a non-surgical procedure for hair regrowth, which is used for treating thinning hair and slowing or stopping the progression of hair loss. Losing your hair can be a hugely distressing thing to go through and it can have an impact on your self-esteem. PRP treatment can therefore tackle both male and female pattern baldness and alopecia as it encourages the growth of existing hair follicles, making your hair appear fuller and healthier without resorting to surgery. It is therefore the most natural way to stimulate hair growth to provide you with a naturally growing full head of hair; to help return your self-esteem and confidence.

Why choose PRP?

Hair loss is generally caused by a lack of cell renewal in the scalp – which makes PRP the perfect treatment as it stimulates the production of new healthy cells. It is a simple and totally natural. PRP provides safe and reliable results and has a very quick recovery period. Only a small amount of blood is taken as though you are having your routine blood test.

PRP Hair treatments provides effective results with a high success rate.

What can PRP achieve?

- Fuller and healthier natural-looking hair
- Significantly increase hair regrowth
- Production of new healthy cells
- Decreased hair dystrophy and burning or itching sensation.
- Can serve as a safe and effective treatment option in alopecia

Before your PRP treatment you will attend a consultation, where you will:

- Be able to discuss your circumstances.
- Undergo a microscopic examination of your hair and scalp combined with a medical history check.
- Undergo a health evaluation to define the cause of the hair loss and to work with you to develop a treatment plan.
- Be given time to ask advice and pose questions.
- Discuss the options that are open to you, including costs and timescales.
- Ask about risks, benefits, and alternatives to PRP.

The PRP Procedure:

- PRP is prepared from an extract of your own blood.
- PRP treatment will commonly last between 30 minutes and 60 minutes
- To do this, 30 – 60 ml of blood is drawn from your arm.
- The blood is placed in a centrifuge. The centrifuge spins and separates the platelets from the rest of the blood components.
- 3 – 6 ml of platelet-rich plasma will then be extracted
- The concentrated and growth factor-concentrated platelets are injected into the scalp via micro injections or stampers.

There is no downtime for PRP so you can immediately return to your normal daily routine. It is recommended that strenuous activity (sweating) and alcohol consumption is avoided for 24 hours post procedure.

The results of PRP can usually be seen between two to three months post treatment. Depending on your type of hair loss, and the extent of the loss, PRP for hair restoration is usually recommended as a course of 3 to 6 treatments spaced 7 – 10 days apart. Then depending on your individual needs, a maintenance session once a month is usual.

£90 or £450 for 6 treatments.
